BOLT TENSIONERS

Bolt tensioning is now the preferred method of tightening bolts and studs on all critical applications. Bolt tensioners are designed for operation in a wide variety of applications including pipeline flanges, heat exchangers, pressure vessels, compressor covers, boiler feed pumps, windmills and many others. We provide a comprehensive range of bolt tensioners for optimum solutions to bolt tensioning requirements. Our Bolt tensioners and accessories are CE marked in accordance with Pressure Equipment and Machinery Directives, as applicable. In comparison to traditional tightening methods, tightening with bolt tensioners offers significant advantages:

- No torsional loading of fasteners.
- Direct loading no damage to assembly.
- Easy and fast operation.
- Very high accuracy and repeatability.
- Automation feasible and can be used for critical applications.

PST SERIES TOPSIDE BOLT TENSIONERS

PST Series Bolt Tensioners are designed for operation in a wide variety of applications including pipeline flanges, heat exchangers, pressure vessels, compressor covers, boilers feed pumps, anchors bolts and many others.

The PST Bolt Tensioner is very simple to use and consists of four parts -Threaded Puller, Load Cell, Bridge and Nut Driver (Nut Rotating Socket).

PST SERIES TOPSIDE BOLT TENSIONERS

Brief Operational Sequence

The nut-driver is placed over the nut (fig.1). The bridge and load cell is then placed over the bolt (fig.2). The Puller is then screwed over the stud protruding above the nut face (fig.3) making sure that at least 1 x diameter of bolt is engaged with the Threaded Puller.

Desired hydraulic pressure is now applied to load cell, which stretches the bolt. (fig.4). The nut is turned down using the nut-driver and tommy bar. The Pressure in then released leaving the stud loaded to the desired value.

THE PST SERIES TOPSIDE BOLT TENSIONERS IS ONE OF THE MOST LIGHT, COMPACT AND VERSATILE LINE OF TENSIONERS AVAILABLE:

Features :

- Versatile Design: The PST Series standard variable tensioners are designed to provide a wide range of flexibility, covering stud sizes from 3/4" to 5.3/4" (M-16 to M-150). Different stud sizes are accommodated by the same load cell by simply changing the adaptor kit consisting of Threaded Puller, Bridge and Nut Driver.
- High Strength Aircraft Quality Alloy Steel: The PST Series tensioners operate at a maximum pressure of 1500 Bar and are manufactured from high strength AISI 4340 alloy steel parts for long lasting trouble free performance.
- Stroke Indicator: The PST Series tensioners have and an exceptional stroke of 15 mm. The Integral Stroke Indicator allows the piston stroke to be viewed while tensioning is in progress. A Red line on piston indicates an over stoke ensuring safe operation.
- Safe Design in event of Piston 'Over Stroke': The PST series tensioners are designed so that in event of over- stroke the high pressure fluid will be released from the inner side of the load cell, thus saving the operator from any potential exposure.
- Multi Tensioning: The PST Series load cell is provisioned with two connections and this acts as a manifold for multi tensioning applications. By using high pressure link hoses, any number of bolt tensioners can be connected and used simultaneously. This ensures equal tightening of all bolts on the flange and reduces work time.
- Anti Roll, Composite Material Seals: All PST Tensioners are fitted with Anti Roll, Composite Material seals for longer life and high reliability. The seals used have a low coefficient of friction so that the piston can be returned to a closed position with minimal effort. PST Series tensioners can be provided with machined PU (poly urethane) seals if requested by the customer.
- Floating Piston: The unique piston design allows 2^o tilt without any loss of load, preventing piston seizure or damage to piston bore.

TSS SERIES SUB SEA BOLT TENSIONERS

TSS Series Bolt Tensioners are specially designed for sub sea applications. These Tensioners are suitable for higher pressure rating flanges also. It's ergonomic design makes it very easy to handle and use by divers under the harsh sea conditions. These tensioners are designed to provide a wide range of flexibility, covering stud sizes 3/4" to 3.1/2" (M-18 to M-85).

The tool consists of two basic parts - Tensioning Unit and Puller Nut as shown below:

Features :

- High Strength Stainless Steel Construction: The Complete tool is made from high strength stainless steel for use in corrosive sea environment and to minimize maintenance. Optional alloy still construction also available.
- Versatile Design: Designed to provide a wide range of flexibility, covering stud sizes 3/4" to 3.1/2" (M-18 to M-85) using just 8 load cells.
- Higher Load generation: Generates higher load making it suitable for higher pressure rating flanges (API 170 10K).
- Long Stroke And Stroke Indication: All tensioners have a 25mm long stroke with piston marked with fluorescent rings for indication of stroke and over stroke limit.
- Safe Design in event of Piston 'Over Stroke': Designed to release high pressure hydraulic oil inwards in the event of over-stroke, thus saving the operator from any potential exposure.
- Multi Tensioning: The tensioning unit cell is provisioned with two connections that act as a manifold for multi tensioning applications.
- Anti Roll, Composite Material Seals: Fitted with Anti Roll, Composite Material seals for longer life and high reliability. The seals used have a low coefficient of friction so that the piston can be returned to a closed position with minimal effort. Sub Sea tensioners can be provided with machined PU (poly urethane) seals if requested by the customer.
- Split Nut: Optional Split Nut available for fast and easy fitment which ensures most efficient use of expensive diver time.
- Safe Handling: Provisioned with detachable hooks and strap for easy handling under water.
- Non Slip Tool Surface: Knurled and formed surface allows easy handling.
- Fluorescent band: Fluorescent band provided on load cell body for easy tool identification in poor visibility conditions.

WIND MILL BOLT TENSIONERS

MSBT Series Bolt Tensioner :

These 1500 bar working pressure tensioners are specially developed from our Compact series to meet auto retract and ease of operation requirement of wind mill application.

The main features of MSBT Series tensioners are as below :

- Compact Design: The tensioners are designed with smaller dia for ease of tool fitment.
- Higher Working Pressure: 1500 bar working pressure to generate higher load with smaller hydraulic area of tensioner.
- Geared Nut Drive: Geared Nut Driver to move the nut faster and with ease using standard 1/2" Square Drive Wrench.
- Longer Stroke: Tool is available with standard and long stroke as per application.
- Alloy Steel Construction : All parts are made from High Strength Alloy Steel better strength and compact design.
- Customised Adaptor Kits : CAT series tensioners are available with both standard and customised adaptor kit.
- Optional Auto Spring Return: Standard tensioners are available with optional auto spring retraction for fast and easy retraction of piston.

SPECIFIC APPLICATION BOLT TENSIONERS

Dedicated Tensioner :

Dedicated Tensioners are used for Specific Thread Size Application. In these tensioners the threaded piston acts as a puller too. These tensioners are specially designed for applications having space restrictions, around and the stud bolt.

These tensioners are designed and supplied to specific application requirement and have the below specific features:

- **Compact Design:** The dedicated tensioner has a very compact dia for required load and size with nominal requirement of operational height.
- Customised Stroke: Tool is available with standard 15mm and customised stroke as per application.
- Alloy Steel Construction: All parts are made from High Strength Alloy Steel for better strength and compact design.
- Delivery: In-house design and production facilities ensure faster customization and delivery.

Customized Tensioners :

These tensioners are designed for application where standard tensioner can not be accommodated due space and load requirements. Working pressure may be 1500 to 2500 as per application.

All parts of these tensioners are made of Special High Strength Alloy Steel for better design and safety requirement.

ELECTRIC BOLT TENSIONER PUMP PM-EH-1500

The PM-EH-1500 Electric motor with gear pump are designed to provide optimal service with bolt tensioner or hydraulic tools single-acting. Equipped with remote control with 5 m. cable for an easy use, 5 Ltr. tank, electromagnetic level and protective framework it is the ideal tool under all job conditions.

| Model | | PM-EH-1500 |
|-----------------------------|---------|---|
| | bar | 150 |
| Maximum pressure 1st stage | psi | 2,145 |
| Movimum procedure and store | bar | 1,500 |
| Maximum pressure znu stage | psi | 21,450 |
| Hydraulic flow 1st stage | Lt./min | 3 |
| Hydraulic flow 2nd stage | Lt./min | 0.7 |
| Power rating and Voltage | kW / V | 0.7 / 230 V - 50Hz / single-phase |
| Speed | rpm | 1500 |
| Sound level | dB(A) | 80 |
| Intensification factor | | 13 : 1 |
| Electric pump weight | Kg. | 42 (with 5 Lt. Reservoir, frame and remote control) |

Other Models with higher maximum operating pressures, digital pressure gauges and larger hydraulic reservoir capacities are available as per customer requirements.

Technical Features :

- Heavy Duty Steel Frame: Unit is enclosed in heavy duty frame for protection during handling usage and transportation.
- Calibrated Pressure Gauge: Calibrated 100mm (4"), liquid filled, 2000 bar rating pressure gauge with dual reading of bar and psi.
- Ergonomical layout: Logical layout of equipments and controls ensure easy operation and maintenance.
- High Flow Rate: Provides high initial flow rate to ensure faster operation.
- **Remote Control:** Hand haled remote control for easy and safe operation.
- High Quality Equipments: Heavy duty cycle comforts for reliability and durability of the unit.

AIR OPERATED HYDRAULIC BOLT TENSIONER PUMP PU-AH-1500

The PU-AH-1500 air operated pumps are designed and manufactured to meet the highest technical and safety requirements of high pressure equipment.

| Model | PU-AH-1500 |
|---|------------|
| Pressure Ratio | 1:350 |
| Displacement Volume Cm3 | 1.3 |
| Operating Pressure, Max. (at 5.1 bar Pre Limited (PL) Air Pressure) bar | 1,800 |
| Compressed air supply (air drive) | |
| System Operating Air Pressure, Max. bar | 5.1 |
| Safety Valve Set Pressure bar | 5.5 |
| Stainless Steel Tank Capacity | |
| Oil Tank capacity litre | 5 |

Other Models with higher maximum operating pressures, digital pressure gauges and larger hydraulic reservoir capacities are available as per customer requirements.

Technical Features :

- Stainless Steel Frame: The hydraulic unit is installed in a weather proof stainless steel protection frame.
- Logical Control Panel: Logical layout design engraved for easy operation.
- Calibrated Pressure Gauge: Calibrated 150mm (6"), liquid filled, SS Frame, 2500 bar rating pressure gauge with dual reading of bar & psi.
- Complete Air System: System includes FRL Unit, air pressure gauge and control knob for safe air control and supply.
- Higher Operating Pressure: Pump has max working pressure of 1500 bar to cover all bolt tensioning applications.
- Light Weight: Unit weighs only 22 Kg and measures 380mm x 80mm x 410mm.
- Lower Input air Pressure: Higher pressure ratio of 1 : 350 ensures less input air pressure for operation.
- Quick Connect Outlet: Pump comes fitted with quick connect outlet for easy connection of hydraulic hose.

HAND PUMP PU-HP-1500

Hand Pump

O W E R M A S T E

This hand pump is specialy designed for bolt tensioner applications. The pump is compact and light in weight with longer handle needing very little effort to generate max working load. All pumps are supplied with suitable fittings and stainless steel 70mm dia pressure gauge.

| | | Usable Oil | Outlet | | Net | | |
|------------|--------------------------------------|------------|-----------|--------|-------|--------|--------|
| Model No. | Description | Capacity | Coupler | Length | Width | Height | Weight |
| | | (Liters) | | mm | mm | mm | Kg. |
| PU-HP-1500 | 1500 bar Hand Pump c/w 200 bar gauge | 3.0 | HCS-150-F | 615 | 200 | 190 | 12.0 |

HIGH PRESSURE ACCESSORIES

High Pressure Tensioner Hoses :

High Pressure Tensioner Hoses for various tensioning applications are available in different lengths and end-fittings:

Hose Reel

Lead Hose

Part No.

PU-HG-0150

PU-HG-0300

PU-HG-0500

PU-HG-0300-L

PU-HG-0500-L

Connecting Hose

OAL Mtr.

1.5

3.0

3.0

5.0

5.0

QRC

FXF

FxF

FxM

FxF

F x M

Features :

- 4- Ply construction.
- Available in 1.5m, 3m and 5m standard lengths. Other custom built lengths also available.
- Max. Working Pressure : 1800 Bar.
- Burst Pressure : 4500 Bar.
- Min. Bend Radius : 150mm
- All hoses fitted with quick connect Couplings at both ends.
- Working Temperature Range: -30 to 80 Deg C.
- Tensioner Hose Reel of upto 500m single hose for sub sea applications available with required end fittings.

Manifolds, Fittings and Couplings :

Manifolds, Fittings and Couplings of various configurations are available for all tensioning applications:

Couplings

Fittings

Manifolds

Features :

- Manifold /Blocks for 1500 working pressure.
- T-Fittings for 1500 Bar working pressure.
- Male / Female Couplings for 1500 and 2500 bar working pressure.
- High Pressure Fittings and Adaptors.

| Part No. | Description |
|-----------|---------------------|
| HCS-150-F | Coupling, 150 Mpa |
| HCS-150-M | Nipple, 150 Mpa |
| HCS-250-F | Coupling, 250 Mpa |
| HCS-250-F | Nipple, 250 Mpa |
| HF-G4-G4 | Fitting, G 1/4 CS |
| HF-G4-M16 | Fitting G 1/4 x M16 |

BOLT TENSIONER APPLICATION

Important formula :

- (A) **Residual Bolt Load** = Bolt Stress x Bolt Tensile Stress Area
 - = (Bolt Stretch x Modulus of Elasticity x Bolt Tensile stress area) Effective Length.
- (B) Bolt Tensile Stress Area =(3.14 x D x D) . (D is smallest Stress Dia of Bolt)
- (C) % of Yield Strength = (Bolt Stress Required / Yield Strength of bolt) x 100
- (D) Hydraulic Pressure = (Residual Bolt Load x Load Relaxation Factor) Hydraulic Area of Load Cell.
- (E) Load Relaxation Factor =1.01 + (Bolt Size (Dia.) Effective Length) or 1.1 which ever is greater.

100% Tool Coverage

Basic Calculation and Working :

- a. Calculate Bolt Residual Load: Residual Load can be calculated from known stress or bolt stretch requirement.
- b. Calculate Load Relaxation factor using Bolt Dia and Effective Length. It can be calculated from below formula / Chart.

- c. Calculate application hydraulic load.
- d. Calculate hydraulic pressure for required hydraulic load.
- e. Select Tensioning Procedure. (25%, 50%, 100%...etc.)
- f. Calculate pass load as applicable. (Max applied load should never exceed 95% bolt yield strength).

Useful Conversions :

| Area | : 1 millimeter ² (mm ²) = 0.00155 inch ² | $1 \operatorname{inch}^2 = 645.16 \operatorname{mm}^2$ |
|--------------|--|--|
| | . i centimeter (cm) – 0.155 inch | 1 111011 - 0.4510 0111 |
| Load (Force) | : 1 Metric Ton (mt) = 1.10231 Short Ton (US) | |
| | : 1 Kilo Niwton, kN = 224.8089 lb | |
| | : 1 Metric Ton (mt) = 9.8066 kN | |
| Pressure | : 1 Megapascal (MPa) = 10 Bar | 1 bar = 14.5037 psi |
| | : 1 Kg per cm ² (Kg/cm ²) = 0.98066 Bar | 1 bar = 1.0197 Kg/cm ² |

APPLICATION CHECKLIST

Dimensional Details

| Thread Pitch / TPI | Stud material. |
|--|---|
| Stud strength. | Desired retained stress in stud. |
| Depth if nut fits in a counterbore (or spot face dep | th) |
| Service temperature. | Desired stroke or amount of flange compression. |
